

ARP Connector Block

DNA Group, Inc.

The ARP Series rocker switch has an optional mating connector block for ease of assembly. A production line can pre-wire the connector block and then install up to 10 wires onto the ARP rocker switch all at one time with less force typically required to install ten wires. Our connector block is designed to work with both AMP and Molex type Quick Connect receptacles.

Features

- ◆ Compatible female terminals are the AMP 42100 series and Molex 940303911
- ◆ Thermoplastic fuel-resistant material
- ◆ For use with 2-10 universal QC terminals
- ◆ 3 levels of lock-on terminal connection
